PREMETEC

# Stable in Motion

Not the biggest,  
BUT **THE BEST !**

**PERMETEC**

## Business Philosophies of PERMETEC

- Integrity is our first priority
- Always maintaining a consistent focus on our core business
- Building the best quality into all aspects of our business
- Treat customers as partners
- Long-term vision and strategies
- Culture of continuous improvement

PERMETEC developed an ISO compliant process to ensure quality control throughout the entire manufacturing process. We have a comprehensive in-house quality control structure that is fully integrated with each process-from initial received material analysis through three dimensional precision measurement checks. Throughout each process, our state-of-the-art testing machines-strength and performance evaluations, guarantee a stable and dependable supply of high quality products.

**Quality Integration**

Product: Integrated Road bar  
Material: Carbon

Product: Riser / Flat Bar, Road Bar, TT Bar  
Material: Carbon, Aluminum Alloy

## Precision CARBON LAY-UP

Our precise lay-up process provides accurate high fiber to resin ratios and offers precision control throughout the entire component structure. We provide design analysis and testing to achieve all the benefits you require-lighter and stronger products. Our entire staff is cross trained over the entire lay-up process and our dedicated QC staff is motivated to ensure the highest quality of production is delivered for your products. Our tracking / code system assures batch control along with integrated work flow.

Product: Extrusion tube (Seamless)  
Material: Aluminum Alloy

Product: Hydro-forming Frame Tube  
Facility: Max. OD 130 mm  
Material: Aluminum Alloy

Product: Riser / Flare Road Bar  
Material: Carbon, Aluminum Alloy

Product: Base Bar / Extension Bar  
Material: Carbon, Aluminum Alloy

Premetec has integrated in-hous capability for manipulating tubing including butting, swaging, heat treatment, taper walling and hydro-forming. we are not only a fabricator of metal products, but has in-house finishing capability to support end use requirements including anodize, laser etch, pad printing, silk screen, water decal and finished con sumer packaging.

## Integrated Capability, from Tubing to Branding

Product: Motorcycle Handlebar  
Material: Aluminum Alloy

Product: Hydro-forming Frame Tube  
Material: Aluminum Alloy

Yeu Chueh Industry Co., LTD.

- Handle Bars
- Hydro-forming Tubes
- Suspension Fork Tubes
- Extrusion (seamless tube)
- Anodizing
